

Tortoise Energy Independence Fund, Inc.

2014 Annual Report · November 30, 2014

The North American energy revolution

Fund at a glance

Tortoise believes Tortoise Energy Independence Fund, Inc. (NYSE: NDP) is the first closed-end fund with a focus on North American crude oil and natural gas production growth — growth which supports energy independence.

Investment opportunity

Technological developments are now providing access to vast amounts of unconventional resources in North American oil and gas reservoirs, with the potential for an extended period of production growth. Virtually unthinkable a few years ago, North America now has the opportunity to be a global leader in energy production, with many experts predicting North America could become energy self-sufficient over the coming decades.

To capture the heart of this significant North American production growth potential, NDP invests in energy producers, also known as the upstream portion of the energy value chain. While commodity prices will fluctuate, we believe the sector's volume growth potential provides an attractive long-term investment opportunity.

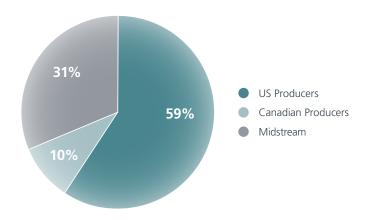

Targeted investment characteristics

NDP primarily invests in North American energy companies that engage in the exploration and production of crude oil, condensate, natural gas and natural gas liquids that generally have a significant presence in North American oil and gas fields, including shale reservoirs, and, to a lesser extent, in companies that provide associated transportation, processing and storage. The majority of NDP's investments include upstream energy companies with the following targeted characteristics:

- Substantial acreage positions in premier North American oil and gas fields
- Production volume growth potential over many years
- High quality, financially disciplined management teams
- Total return potential through a combination of current income and capital appreciation

We also write (sell) out-of-the-money covered call options on companies that meet our investment thresholds, seeking to mitigate portfolio risk, increase current income and enhance long-term total return potential across economic cycles.

Portfolio statistics at November 30, 2014 (unaudited)

December 31, 2014

Dear fellow stockholders,

The broad energy sector, including oil and gas producers, had a strong first three quarters of the fiscal year ending Nov. 30, 2014, benefiting from robust volumes of oil and natural gas being produced out of North American shales. However, energy stocks retreated significantly in the fourth quarter as investors reacted to the drop in crude oil prices.

Factors pressuring oil prices included increasing global supply, particularly out of Libya, where production had been offline due to political strife, slowing global demand growth and a strengthening U.S. dollar. In addition, oil prices fell sharply following the Organization of the Petroleum Exporting Countries' (OPEC) Nov. 27 announcement that it would not cut current crude oil production levels.

Despite the challenges in the energy sector, which emerged as the worst-performing sector for the fiscal year, broader equity market performance was solid during the same period, with the S&P 500 Index® reaching record highs. The U.S. economy expanded during the year, with a steady stream of upbeat economic data reflecting continued healthy domestic growth, although the global economy continued to struggle, with weakness particularly in Europe and Asia.

Energy production review and outlook

Oil and gas producers dramatically underperformed the broader equity market in fiscal 2014. The Tortoise North American Oil and Gas Producers IndexSM posted a -17.5 percent return for the fiscal year, compared to the S&P 500 Index's® 16.9 percent total return for the same period. These returns reflect a difficult fourth fiscal quarter for the sector with oil and gas producers experiencing a -30.1 percent return. Despite their strong showing earlier in the year, their overall performance for this fiscal period was negatively affected by the price of crude oil, with WTI (West Texas Intermediate) falling approximately 50 percent from its July 23 peak of \$107.62 per barrel to close the fiscal year at \$66.15 per barrel, and prices continued to decline through December.

Despite lower crude oil prices, total U.S. crude oil production remained robust, averaging an estimated 8.6 million barrels per day (MMbbl/d) in 2014, with 2015 production estimated to average 9.3 MMbbl/d.¹ A majority of the increase is expected to come out of the premier North American oil shales – the Bakken, the Eagle Ford and the Permian. The current crude oil supply/demand

imbalance is expected to improve beginning in the second half of 2015, when demand for crude oil typically increases and the pace of supply growth is expected to slow.

Meanwhile, natural gas production also has been strong, despite lower prices as well, with volumes in 2014 averaging an estimated 70.0 billion cubic feet per day (Bcf/d) for the lower 48 states and projected to grow an average 3.1 percent in 2015.¹ Price fluctuations were driven largely by seasonal demand, with natural gas opening the fiscal year at \$3.79 per million British thermal units (MMBtu), peaking at \$7.92 per MMBtu on March 4 as a colder-than-usual winter gripped much of the nation, then normalizing as inventories were rebuilt over the summer to close the fiscal year at \$4.24 per MMBtu and prices continued to decline through December.

Fund performance review

The fund's total assets decreased from approximately \$442.7 million on Nov. 30, 2013 to \$400.1 million on Nov. 30, 2014, due largely to declining market values of its investments. The fund's fiscal 2014 market-based and NAV-based total returns were -5.2 percent and -7.8 percent, respectively (including the reinvestment of distributions). This performance particularly reflects a difficult fourth fiscal quarter, when the fund's market-based and NAV-based returns were -20.5 percent and -25.2 percent, respectively, driven by the broader upstream energy market decline.

The discount of the fund's stock price relative to its NAV narrowed over the year, particularly in the fourth quarter, ending the year at a 6.5 percent discount. We are undertaking some efforts that we believe may help improve investor sentiment and could help continue to close that gap. We continue to believe in the closed-end fund structure and believe NDP is fundamentally well-positioned for the long term, which is particularly relevant in today's environment. We plan to increase education, communication and outreach emphasizing the benefits of the closed-end fund structure and the long-term attractive risk-reward potential of the fund's strategy to both existing and potential stockholders. We'll continue to work internally and with the fund board to explore other areas that may benefit market performance while maintaining our long-term, prudent approach to managing the fund.

The fund paid a distribution of \$0.4375 per common share (\$1.75 annualized) to stockholders on Nov. 28, 2014. This distribution represented an annualized distribution rate of

8.2 percent based on the fund's fiscal year closing price of \$21.29. For tax purposes, distributions to stockholders for 2014 were 56 percent ordinary dividend income, 12 percent qualified dividend income, 27 percent long-term capital gains and 5 percent return of capital. The fund ended the period with leverage (bank debt) at 14.0 percent of total assets, slightly more than last year, due to the decrease in the value of fund assets.

Key quarterly asset performance drivers

A number of factors influenced the fund's absolute and relative asset performance during the fiscal year and the fourth fiscal quarter.

- The fund's focus on oil and gas producers hurt absolute performance. However, its strategic selection of companies, particularly in the Eagle Ford, helped the fund outperform on a relative basis for both the fiscal year and the challenging fourth fiscal guarter.
- Natural gas producers fared better than liquids producers, particularly in the fourth quarter as crude oil prices declined sharply. The fund's stake in gas producers in the Marcellus detracted from absolute performance for both the fiscal year and the fourth quarter; however, they helped in relative terms during the fourth quarter, as pipeline takeaway constraints continued in that region and natural gas producers pulled back along with the broader energy sector.
- The fund's holdings in midstream pipeline companies contributed positively to relative results for both the fiscal year and fourth quarter as these firms are less affected by falling oil prices.
- The fund's covered call strategy continued to provide additional current income in the portfolio and mitigated risk. In higher-volatility environments such as the one we currently are experiencing, this strategy can be especially effective. The notional amount of the fund's covered calls averaged approximately 47.9 percent of total assets and their out-of-the money percentage averaged approximately 8.9 percent during the year.

Additional information about the fund's financial performance, distributions and leverage is available in the Key Financial Data and Management's Discussion sections of this report.

Concluding thoughts

In our view, when oil prices move lower, location of assets becomes even more critical. Our approach has been to focus on high-quality oil and gas producers in the most prolific basins that also have strong balance sheets, distribution coverage, and growing cash flows. We have constructed the fund's portfolio to operate in multiple commodity price environments, anchored in producers that, in our view, are located in the best oil and gas fields in North America. For these reasons, we believe the portfolio is both well positioned and diversified, given the changing dynamics in the energy sector.

Furthermore, we believe that the laws of economics will prevail. Lower prices may discourage short-term production growth but may also spur demand. We anticipate this will drive prices in the other direction, and the cycle will continue. We think that over the long term, prices will return to a range that is economical for production to continue broadly, which should bode well for many upstream oil and gas producers.

Despite recent volatility, what is particularly noteworthy is that North America is now a major, relevant global energy player, with the ability to better control our national security and with significant production potential for generations to come, though at a slower pace in the near term. We believe that NDP offers an attractive long-term investment opportunity despite current headwinds.

Sincerely,
The Managing Directors
Tortoise Capital Advisors, L.L.C.
The adviser to Tortoise Energy Independence Fund, Inc.

The Tortoise North American Oil and Gas Producers IndexSM is a float-adjusted, capitalization weighted index of North American energy companies engaged primarily in the production of crude oil, condensate, natural gas or natural gas liquids (NGLs). The S&P 500 IndexSM is an unmanaged market-value-weighted index of stocks, which is widely regarded as the standard for measuring large-cap U.S. stock market performance.

Performance data quoted represents past performance; past performance does not guarantee future results. Like any other stock, total return and market value will fluctuate so that an investment, when sold, may be worth more or less than original cost.

Management's Discussion (unaudited)

The information contained in this section should be read in conjunction with our Financial Statements and the Notes thereto. In addition, this report contains certain forwardlooking statements. These statements include the plans and objectives of management for future operations and financial objectives and can be identified by the use of forward-looking terminology such as "may," "will," "expect," "intend," "anticipate," "estimate," or "continue" or the negative thereof or other variations thereon or comparable terminology. These forward-looking statements are subject to the inherent uncertainties in predicting future results and conditions. Certain factors that could cause actual results and conditions to differ materially from those projected in these forward-looking statements are set forth in the "Risk Factors" section of our public filings with the SEC.

Overview

Tortoise Energy Independence Fund, Inc.'s ("NDP") primary investment objective is to provide a high level of total return, with an emphasis on current distributions. We seek to provide stockholders an efficient vehicle to invest in a portfolio consisting primarily of equity securities of companies that provide access to North American oil and gas production growth, which supports North American energy independence through reduced reliance on foreign energy sources. We focus primarily on North American energy companies that engage in the exploration and production of crude oil, condensate, natural gas and natural gas liquids ("NGLs") that generally have a strong presence in North American oil and gas reservoirs, including shale, and, to a lesser extent, on companies that provide associated transportation, processing, storage, servicing and equipment. We also seek to provide current income from gains earned through a covered call option strategy, which consists of writing (selling) call options on selected equity securities in our portfolio.

NDP is a registered non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the "1940 Act"), and expects to qualify as a regulated investment company ("RIC") under the U.S. Internal Revenue Code of 1986, as amended (the "Code"). Tortoise Capital Advisors, L.L.C. (the "Adviser") serves as investment adviser.

Company update

Market values of our investments decreased during the quarter, contributing to a decrease in total assets of approximately \$113.3 million during 4th quarter 2014. Distribution increases from our investments were in line with our expectations while net premiums on options written declined from 3rd quarter 2014. Average total assets decreased during the quarter, resulting in decreased asset-based expenses. The amount of leverage outstanding declined during the quarter, but the ratio of leverage to total assets increased from the prior quarter due to the reduction in asset values. We maintained our regular quarterly distribution of \$0.4375 per share. Additional information on these events and results of our operations are discussed below.

Critical accounting policies

The financial statements are based on the selection and application of critical accounting policies, which require management to make significant estimates and assumptions. Critical accounting policies are those that are both important to the presentation of our financial condition and results of operations and require management's most difficult, complex, or subjective judgments. Our critical accounting policies are those applicable to the valuation of investments and certain revenue recognition matters as discussed in Note 2 in the Notes to Financial Statements

Determining distributions to stockholders

We pay quarterly distributions based primarily upon our current and estimated future distributable cash flow ("DCF"). In addition, and to the extent that the sum of our net investment company taxable income and net realized gains from investments exceed our quarterly distributions, we intend to make an additional distribution to common stockholders in the last quarter of the calendar year in order to avoid being subject to U.S. federal income taxes at the fund level. Our Board of Directors reviews the distribution rate quarterly and may adjust the quarterly distribution throughout the year.

Determining DCF

DCF is income from investments less expenses. Income from investments includes the amount we receive as cash or paid-in-kind distributions from common stock, master limited partnerships ("MLPs") or affiliates of MLPs in which we invest and dividend payments on short-term investments we own. Income also includes the premiums received from sales of covered call options, net of amounts paid to buy back out of the money options. The total expenses include current or anticipated operating expenses and leverage costs.

The Key Financial Data table discloses the calculation of DCF and should be read in conjunction with this discussion. The difference between income from investments in the DCF calculation and total investment income as reported in the

Management's Discussion (unaudited)

(continued)

Statement of Operations, is reconciled as follows: (1) GAAP recognizes that a significant portion of the cash distributions received from our investments are characterized as a return of capital and therefore excluded from investment income, whereas the DCF calculation includes the return of capital; (2) income from investments in the DCF calculation includes the value of dividends paid-in-kind (additional stock or units), whereas such amounts are not included as income for GAAP purposes; and (3) net premiums on options written (premiums received less amounts paid to buy back out of the money options) with expiration dates during our fiscal quarter are included in the DCF calculation, whereas GAAP recognizes the net effect of options written as realized and unrealized gains (losses). A reconciliation of Net Investment Income to DCF is included below in Distributable Cash Flow and Capital Gains.

Income from investments

We seek to achieve our investment objectives by investing in a portfolio consisting primarily of equity securities of companies that provide access to North American oil and gas production growth. We evaluate each holding based upon its contribution to our investment income and its risk relative to other potential investments.

We focus primarily on North American energy companies that engage in the exploration and production of crude oil, condensate, natural gas and NGLs that generally have a strong presence in North American oil and gas reservoirs, including shale.

We also seek to provide current income from gains earned through a covered call option strategy, which consists of writing (selling) call options on selected equity securities in our portfolio. We typically aim to write call options that are approximately 5 to 15 percent out-of-the-money on approximately 75 percent of our portfolio, although we may adjust these targets depending on market volatility and other market conditions.

Total distributions received from our investments and option strategy for the 4th quarter 2014 were approximately \$7.5 million, including earnings on our investments of \$3.3 million and net premiums on options written of approximately \$4.2 million. This represents a decrease of approximately 8.2 percent as compared to 4th quarter 2013 and approximately 2.7 percent as compared to 3rd quarter 2014. Net premiums received on options written during the 4th quarter 2014 declined by approximately 3.9 percent as compared to 3rd quarter 2014, but remains in line with our expectations given the targets indicated above in the current market environment. On an annualized basis, the total received from investments

for the 4th quarter 2014 equates to 6.90 percent of our average total assets for the quarter as compared to 5.96 percent for 3rd quarter 2014.

Expenses

We incur two types of expenses: (1) operating expenses, consisting primarily of the advisory fee; and (2) leverage costs. On a percentage basis, operating expenses before leverage costs were an annualized 1.14 percent of average total assets for the 4th guarter 2014, an increase of 0.06 percent as compared to 3rd quarter 2014 and 0.05 percent as compared to 4th guarter 2013. Advisory fees, net of fees waived, for the 4th guarter 2014 decreased 11.7 percent from 3rd quarter 2014 as a result of decreased average managed assets during the guarter. While the contractual advisory fee is 1.10 percent of average monthly managed assets, the Adviser has agreed to waive an amount equal to 0.15 percent of average monthly managed assets through December 31, 2014 and 0.10 percent of average monthly managed assets for the period from January 1, 2015 through December 31, 2016. Other operating expenses decreased from 3rd quarter 2014, primarily due to other asset-based fees.

Leverage costs consist of the interest expense on our margin borrowing facility, which accrues on the margin facility at a rate equal to one-month LIBOR plus 0.80 percent. The annual rate of leverage may vary in future periods as a result of changes in LIBOR and the spread charged on the facility. The average annualized total cost of leverage was 0.95 percent as of November 30, 2014. Total leverage costs for DCF purposes were approximately \$144,000 for the 4th quarter 2014, a decrease of 4.6 percent as compared to 3rd quarter 2014, due to lower leverage utilization during the quarter as well as a change in margin facilities during the quarter that decreased the allin cost of leverage. Additional information on our leverage is disclosed below in Liquidity and Capital Resources and in our Notes to Financial Statements.

Distributable cash flow and capital gains

For 4th quarter 2014, our DCF was approximately \$6.1 million, a decrease of 10.1 percent as compared to 4th quarter 2013 and 0.8 percent as compared to 3rd quarter 2014. This is the net result of the changes in income and expenses as described above. This equates to an annualized rate of 5.76 percent of average total assets for the quarter and 6.17 percent of average net assets for the quarter. We paid a distribution of approximately \$6.4 million, or \$0.4375 per share, during the quarter, unchanged from 3rd quarter 2014.

Management's Discussion (unaudited)

(continued)

Net Investment Loss on the Statement of Operations is adjusted as follows to reconcile to DCF for fiscal year 2014 and 4th quarter 2014 (in thousands):

	FY 2014	4th Qtr 2014
Net Investment Loss	\$ (1,814)	\$ (205)
Adjustments to reconcile to DCF:		
Net premiums on options written	17,375	4,148
Distributions characterized as return of capital	7,494	1,730
Dividends paid in stock	1,629	412
DCF	\$24,684	\$ 6,085

In addition, we had net realized gains on investments of approximately \$0.7 million during 4th quarter 2014.

Liquidity and capital resources

We had total assets of approximately \$400.1 million at quarter-end. Our total assets reflect the value of our investments, which are itemized in the Schedule of Investments. It also reflects cash, interest and receivables and any expenses that may have been prepaid. During 4th quarter 2014, total assets decreased approximately \$113.3 million. This change was primarily the result of a \$121.7 million decrease in the value of our investments as reflected by the change in realized and unrealized gains on investments (excluding return of capital on distributions), net purchases of approximately \$2.0 million and an increase in receivables and other assets of approximately \$6.4 million.

Our leverage consists of a 270-day rolling evergreen margin loan facility with a borrowing capacity of \$85 million. Total leverage outstanding at November 30, 2014 was \$56.2 million, a decrease of \$2.4 million as compared to August 31, 2014. Total leverage represented 14.0 percent of total assets at November 30, 2014, an increase from 11.4 percent as compared to August 31, 2014 and from 12.7 percent at November 30, 2013. Our leverage as a percent of total assets is within our long-term target level of 10 to 15 percent of total assets. This allows the opportunity to add leverage when compelling investment opportunities arise. Temporary increases to up to 20 percent of our total assets may be permitted, provided that such leverage is consistent with the limits set forth in the 1940 Act, and that such leverage is expected to be reduced over time in an orderly fashion to reach our long-term target. Our leverage ratio is impacted by increases or decreases in market values of our investments, issuance of equity and/or the sale of securities where proceeds are used to reduce leverage.

We use leverage to acquire investments consistent with our investment philosophy. The terms of our leverage are governed by regulatory and contractual asset coverage requirements that arise from the use of leverage. Additional information on our leverage and asset coverage requirements is discussed in Note 10 in the Notes to Financial Statements. Our coverage ratios are updated each week on our Web site at www.tortoiseadvisors.com.

Taxation of our distributions

We expect that distributions paid on common shares will generally consist of: (i) investment company taxable income ("ICTI") which includes ordinary income net of deductions plus any short-term capital gains in excess of net long-term capital losses (under current law, distributions of ICTI may be designated as qualified dividend income ("QDI") to the extent of any QDI received from our investment in common stocks); (ii) long-term capital gain (net gain from the sale of a capital asset held longer than 12 months over net short-term capital losses) and (iii) return of capital. The QDI and long-term capital gain tax rates are variable based on the taxpayer's taxable income.

We may designate a portion of our quarterly distributions as capital gains and we may also distribute additional capital gains in the last calendar quarter if necessary to meet minimum distribution requirements and to avoid being subject to excise taxes. If, however, we elect to retain any capital gains, we will be subject to U.S. capital gains taxes. The payment of those taxes will flow-through to stockholders as a tax credit to apply against their U.S. income tax payable on the deemed distribution of the retained capital gain.

For tax purposes, distributions paid to common stockholders for the calendar year ended December 31, 2014 were approximately 12 percent QDI, 56 percent ordinary dividend income, 27 percent long-term capital gain, and 5 percent return of capital. A holder of our common stock would reduce their cost basis for income tax purposes by the amount designated as return of capital. This information is reported to stockholders on Form 1099-DIV and is available on our Web site at www.tortoiseadvisors.com.

Period from

⁽²⁾ Information presented relates to a share of common stock outstanding for the entire period.

⁽³⁾ The per common share data for the year ended November 30, 2013 and the period from July 31, 2012 through November 30, 2012 do not reflect the change in estimate of investment income and return of capital. See Note 2C to the financial statements for further disclosure.

⁽⁴⁾ Less than \$0.01 for the year ended November 30, 2014.

⁽⁵⁾ Represents the dilution per common share from underwriting and other offering costs for the period from July 31, 2012 through November 30, 2012.

⁽⁶⁾ Not annualized for periods less than one full year.

⁽⁷⁾ Total investment return is calculated assuming a purchase of common stock at the beginning of the period (or initial public offering price) and a sale at the closing price on the last day of the period reported (excluding brokerage commissions). The calculation also assumes reinvestment of distributions at actual prices pursuant to the Company's dividend reinvestment plan.

⁽⁸⁾ Annualized for periods less than one full year.

⁽⁹⁾ Represents value of total assets less all liabilities and indebtedness not represented by credit facility borrowings at the end of the period divided by credit facility borrowings outstanding at the end of the period.

Notes to Financial Statements

November 30, 2014

1. Organization

Tortoise Energy Independence Fund, Inc. (the "Company") was organized as a Maryland corporation on April 11, 2012, and is a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the "1940 Act"). The Company's primary investment objective is to provide a high level of total return, with an emphasis on current distributions. The Company seeks to provide its stockholders an efficient vehicle to invest in a portfolio consisting primarily of equity securities of North American energy companies. The Company commenced operations on July 31, 2012. The Company's stock is listed on the New York Stock Exchange under the symbol "NDP."

2. Significant accounting policies

A. Use of estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

B. Investment valuation

The Company primarily owns securities that are listed on a securities exchange or over-the-counter market. The Company values those securities at their last sale price on that exchange or over-the-counter market on the valuation date. If the security is listed on more than one exchange, the Company uses the price of the exchange that it considers to be the principal exchange on which the security is traded. Securities listed on the NASDAQ will be valued at the NASDAQ Official Closing Price, which may not necessarily represent the last sale price. If there has been no sale on such exchange or over-the-counter market on such day, the security will be valued at the mean between the last bid price and last ask price on such day.

The Company may invest up to 30 percent of its total assets in unregistered or otherwise restricted securities. Restricted securities are subject to statutory or contractual restrictions on their public resale, which may make it more difficult to obtain a valuation and may limit the Company's ability to dispose of them. Investments in restricted securities and other securities for which market quotations are not readily available will be valued in good faith by using fair value procedures approved by the Board of Directors. Such fair value procedures consider factors such as discounts to publicly traded issues, time until conversion date, securities

with similar yields, quality, type of issue, coupon, duration and rating. If events occur that will affect the value of the Company's portfolio securities before the net asset value has been calculated (a "significant event"), the portfolio securities so affected will generally be priced using fair value procedures. The Company did not hold any restricted securities at November 30, 2014.

An equity security of a publicly traded company acquired in a direct placement transaction may be subject to restrictions on resale that can affect the security's liquidity and fair value. Such securities that are convertible or otherwise will become freely tradable will be valued based on the market value of the freely tradable security less an applicable discount. Generally, the discount will initially be equal to the discount at which the Company purchased the securities. To the extent that such securities are convertible or otherwise become freely tradable within a time frame that may be reasonably determined, an amortization schedule may be used to determine the discount.

Exchange-traded options are valued at the last reported sale price on any exchange on which they trade. If no sales are reported on any exchange on the measurement date, exchange-traded options shall be valued at the mean between the highest bid and last lowest asked prices obtained as of the closing of the exchanges on which the option is traded.

The value of Flexible Exchange Options (FLEX Options) are determined (i) by an evaluated price as determined by a third-party valuation service; or (ii) by using a quotation provided by a broker-dealer.

The Company generally values debt securities at prices based on market quotations for such securities, except those securities purchased with 60 days or less to maturity are valued on the basis of amortized cost, which approximates market value.

C. Security transactions and investment income

Security transactions are accounted for on the date the securities are purchased or sold (trade date). Realized gains and losses are reported on an identified cost basis. Interest income is recognized on the accrual basis, including amortization of premiums and accretion of discounts. Dividend income and distributions are recorded on the ex-dividend date. Distributions received from investments generally are comprised of ordinary income and return of capital. The Company allocates distributions between investment income and return of capital based on estimates made at the time such distributions are received. Such estimates are based on information provided by each portfolio company and other industry sources. These

Notes to Financial Statements (continued)

estimates may subsequently be revised based on actual allocations received from the portfolio companies after their tax reporting periods are concluded, as the actual character of these distributions is not known until after the fiscal year end of the Company.

During the year ended November 30, 2014, the Company reallocated the amount of 2013 investment income and return of capital it recognized based on the 2013 tax reporting information received from the individual Master Limited Partnerships ("MLPs"). This reclassification amounted to a decrease in net investment income of approximately \$959,000 or \$0.066 per share, an increase in unrealized appreciation of investments of approximately \$665,000 or \$0.046 per share, and an increase in realized gains of approximately \$294,000 or \$0.020 per share for the year ended November 30, 2014.

In addition, the Company may be subject to withholding taxes on foreign-sourced income. The Company accrues such taxes when the related income is earned.

D. Foreign currency translation

For foreign currency, investments in foreign securities, and other assets and liabilities denominated in a foreign currency, the Company translates these amounts into U.S. dollars on the following basis: (i) market value of investment securities, assets and liabilities at the current rate of exchange on the valuation date, and (ii) purchases and sales of investment securities, income and expenses at the relevant rates of exchange on the respective dates of such transactions. The Company does not isolate that portion of gains and losses on investments that is due to changes in the foreign exchange rates from that which is due to changes in market prices of equity securities.

E. Distributions to stockholders

Distributions to common stockholders are recorded on the ex-dividend date. The Company intends to make quarterly cash distributions of its investment company taxable income to common stockholders. In addition, on an annual basis, the Company may distribute additional capital gains in the last calendar quarter if necessary to meet minimum distribution requirements and thus avoid being subject to excise taxes. The amount of any distributions will be determined by the Board of Directors. The character of distributions to common stockholders made during the year may differ from their ultimate characterization for federal income tax purposes. Distributions paid to stockholders in excess of investment company taxable income and net realized gains will be treated as return of capital to stockholders.

F. Federal income taxation

The Company qualifies as a regulated investment company ("RIC") under the U.S. Internal Revenue Code of 1986, as amended (the "Code"). As a result, the Company generally will not be subject to U.S. federal income tax on income and gains that it distributes each taxable year to stockholders if it meets certain minimum distribution requirements. The Company is required to distribute substantially all of its income, in addition to other asset diversification requirements. The Company is subject to a 4 percent non-deductible U.S. federal excise tax on certain undistributed income unless the Company makes sufficient distributions to satisfy the excise tax avoidance requirement. The Company invests in MLPs, which generally are treated as partnerships for federal income tax purposes. As a limited partner in the MLPs, the Company reports its allocable share of the MLP's taxable income in computing its own taxable income.

The Company recognizes the tax benefits of uncertain tax positions only when the position is "more likely than not" to be sustained upon examination by the tax authorities based on the technical merits of the tax position. The Company's policy is to record interest and penalties on uncertain tax positions as part of tax expense. The Company has reviewed all open tax years and major jurisdictions and concluded that there is no tax liability resulting from unrecognized tax benefits relating to uncertain income tax positions taken or expected to be taken on a tax return. All tax years since inception remain open to examination by federal and state tax authorities.

G. Offering Costs

Offering costs related to the issuance of common stock are charged to additional paid-in capital when the stock is issued.

H. Derivative financial instruments

The Company seeks to provide current income from gains earned through an option strategy which will normally consist of writing (selling) call options on selected equity securities in the portfolio ("covered calls"). The premium received on a written call option will initially be recorded as a liability and subsequently adjusted to the then current fair value of the option written. Premiums received from writing call options that expire unexercised will be recorded as a realized gain on the expiration date. Premiums received from writing call options that are exercised will be added to the proceeds from the sale of the underlying security to calculate the realized gain (loss). If a written call option is repurchased prior to its exercise or expiration, the realized gain (loss) will be the difference between the premium received and the amount paid to repurchase the option.

Notes to Financial Statements (continued)

I. Indemnifications

Under the Company's organizational documents, its officers and directors are indemnified against certain liabilities arising out of the performance of their duties to the Company. In addition, in the normal course of business, the Company may enter into contracts that provide general indemnification to other parties. The Company's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Company that have not yet occurred, and may not occur. However, the Company has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

3. Concentration risk

Under normal circumstances, the Company will have at least 80 percent of its total assets (including any assets obtained through leverage) in equity securities of North American energy companies, including at least 70 percent of its total assets in equity securities of upstream energy companies. The Company considers a company to be a North American energy company if (i) it is organized under the laws of, or maintains its principal place of business in, North America and (ii) at least 50 percent of its assets, cash flow or revenue is associated with the exploration, development, drilling, completion or production of crude oil, condensate, natural gas and natural gas liquids ("NGLs"), or that provide associated transportation, processing, equipment, storage, and servicing. The Company considers a company to be an upstream energy company if (i) at least 50 percent of its assets, cash flow or revenue is associated with the exploration, development, drilling, completion or production of crude oil, condensate, natural gas and NGLs or (ii) its business is related to energy production or refining as defined by the Standard Industrial Classification ("SIC") system. The Company may invest up to 30 percent of its total assets in restricted securities, primarily through direct investments in securities of listed companies. The Company may also invest up to 25 percent of its total assets in securities of MLPs. The Company will not invest in privately-held companies.

4. Agreements

The Company has entered into an Investment Advisory Agreement with the Adviser. Under the terms of the Agreement, the Company pays the Adviser a fee equal to an annual rate of 1.10 percent of the Company's average monthly total assets (including any assets attributable to leverage) minus accrued liabilities (other than debt entered

into for purposes of leverage and the aggregate liquidation preference of outstanding preferred stock, if any) ("Managed Assets"), in exchange for the investment advisory services provided. The Adviser has contractually agreed to waive fees in an amount equal to 0.15 percent of average monthly Managed Assets for the period from the commencement of operations through December 31, 2014 and 0.10 percent of average monthly Managed Assets for the period from January 1, 2015 through December 31, 2016. The waived fees are not subject to recapture by the Adviser.

U.S. Bancorp Fund Services, LLC serves as the Company's administrator. The Company pays the administrator a monthly fee computed at an annual rate of 0.04 percent of the first \$1,000,000,000 of the Company's Managed Assets, 0.01 percent on the next \$500,000,000 of Managed Assets and 0.005 percent on the remaining balance of the Company's Managed Assets.

Computershare Trust Company, N.A. serves as the Company's transfer agent and registrar and Computershare Inc. serves as the Company's dividend paying agent and agent for the automatic dividend reinvestment plan.

U.S. Bank, N.A. serves as the Company's custodian. The Company pays the custodian a monthly fee computed at an annual rate of 0.004 percent of the average daily market value of the Company's domestic assets and 0.015 percent of the average daily market value of the Company's Canadian Dollar-denominated assets, plus portfolio transaction fees.

5. Income taxes

It is the Company's intention to continue to qualify as a regulated investment company under Subchapter M of the Code and distribute all of its taxable income. Accordingly, no provision for federal income taxes is required in the financial statements.

The amount and character of income and capital gain distributions to be paid, if any, are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles. These differences are primarily due to differences in the timing of recognition of gains or losses on investments. Permanent book and tax basis differences primarily related to return of capital distributions and character differences of realized gains on MLP investments resulted in the reclassification of \$3,942,070 to undistributed net investment income, \$(2,659,811) to accumulated net realized loss and \$(1,282,259) to additional paid-in capital.

Notes to Financial Statements (continued)

The tax character of distributions paid to common stockholders for the years ending November 30, 2014 and November 30, 2013 was as follows:

	Year Ended November 30, 2014	Year Ended November 30, 2013
Ordinary income*	\$17,235,442	\$23,864,641
Long-term capital gain	6,885,314	877,427
Return of capital	1,282,368	855,296
Total distributions	\$25,403,124	\$25,597,364

^{*} For Federal income tax purposes, distributions of short-term capital gains are treated as ordinary income distributions.

As of November 30, 2014, the components of accumulated deficit on a tax basis were as follows:

Unrealized depreciation	\$ (9,392,242)
Other temporary differences*	(3,164,659)
Accumulated deficit	\$(12,556,901)

^{*} Other temporary differences relate to losses deferred under straddle regulations per IRC Code Sec. 1092.

As of November 30, 2014, the aggregate cost of securities for federal income tax purposes was \$399,452,103. The aggregate gross unrealized appreciation for all securities in which there was an excess of fair value over tax cost was \$45,543,346, the aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over fair value was \$52,086,254 and the net unrealized depreciation was \$6,542,908.

6. Fair value of financial instruments

Various inputs are used in determining the fair value of the Company's financial instruments. These inputs are summarized in the three broad levels listed below:

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, market corroborated inputs, etc.)
- Level 3 significant unobservable inputs (including the Company's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following table provides the fair value measurements of applicable Company assets and liabilities by level within the fair value hierarchy as of November 30, 2014. These assets and liabilities are measured on a recurring basis.

Description	Fair Value at November 30, 20	14 Level 1	Level 2		Level 3	
Assets						
Equity Securities:						
Common Stock ^(a)	\$293,957,329	\$293,957,329	\$	_	\$	_
Master Limited Partnerships						
and Related Companies(a)	98,613,833	98,613,833		_		_
Total Fauity Consulting	202 571 162	202 571 162			_	
Total Equity Securities	392,571,162	392,571,162			_	
Other Securities:						
Short-Term Investment(b)	338,033	338,033		_		_
T . I .	£ 202 000 40E	£ 202 000 405	_		_	
Total Assets	\$ 392,909,195	\$ 392,909,195	\$		\$	
			_		_	
Liabilities						
Written Call Options	\$ 369,817	\$ 369,817	\$	_	\$	_
			=		=	

(a) All other industry classifications are identified in the Schedule of Investments.(b) Short-term investment is a sweep investment for cash balances in the Company at November 30, 2014.

The Company did not hold any Level 3 securities during the year ended November 30, 2014. The Company utilizes the beginning of reporting period method for determining transfers between levels. There were no transfers between levels for the year ended November 30, 2014.

Valuation techniques

In general, and where applicable, the Company uses readily available market quotations based upon the last updated sales price from the principal market to determine fair value. This pricing methodology applies to the Company's Level 1 investments and liabilities.

An equity security of a publicly traded company acquired in a private placement transaction without registration under the Securities Act of 1933, as amended (the "1933 Act"), is subject to restrictions on resale that can affect the security's fair value. If such a security is convertible into publicly-traded common shares, the security generally will be valued at the common share market price adjusted by a percentage discount due to the restrictions and categorized as Level 2 in the fair value hierarchy. If the security has characteristics that are dissimilar to the class of security that trades on the open market, the security will generally be valued and categorized as Level 3 in the fair value hierarchy.

Notes to Financial Statements (continued)

7. Derivative financial instruments

The Company has adopted the disclosure provisions of FASB Accounting Standard Codification 815, Derivatives and Hedging ("ASC 815"). ASC 815 requires enhanced disclosures about the Company's use of and accounting for derivative instruments and the effect of derivative instruments on the Company's results of operations and financial position. Tabular disclosure regarding derivative fair value and gain/loss by contract type (e.g., interest rate contracts, foreign exchange contracts, credit contracts, etc.) is required and derivatives accounted for as hedging instruments under ASC 815 must be disclosed separately from those that do not qualify for hedge accounting. Even though the Company may use derivatives in an attempt to achieve an economic hedge, the Company's derivatives are not accounted for as hedging instruments under ASC 815 because investment companies account for their derivatives at fair value and record any changes in fair value in current period earnings.

Transactions in written option contracts for the year ended November 30, 2014, are as follows:

	Number of Contracts	Premium
Options outstanding at November 30, 2013	28,891	\$ 1,548,122
Options written	372,477	18,332,846
Options closed	(259,629)	(13,208,935)
Options exercised	(8,997)	(569,997)
Options expired	(94,913)	(4,501,771)
Options outstanding at November 30, 2014	37,829	\$ 1,600,265

The following table presents the types and fair value of derivatives by location as presented on the Statement of Assets and Liabilities at November 30, 2014:

Derivatives not accounted for as hedging instruments under ASC 815	Location	Fair Value
Written equity call options	Options written, at fair value	\$369,817

Liabilities

The following table presents the effect of derivatives on the Statement of Operations for the year ended November 30, 2014:

	Location of Gains on Derivatives			
Derivatives not accounted for as hedging instruments under ASC 815	Net Realized Gain on Options	Net Unrealized Appreciation of Options		
Written equity call options	\$1,486,837	\$439,391		

8. Investment transactions

For the year ended November 30, 2014, the Company purchased (at cost) and sold securities (proceeds received) in the amount of \$202,625,163 and \$215,510,773 (excluding short-term debt securities), respectively.

9. Common stock

The Company has 100,000,000 shares of capital stock authorized and 14,516,071 shares outstanding at November 30, 2014 and November 30, 2013.

10. Credit facility

At November 30, 2014, the Company has a 270-day rolling evergreen margin loan facility with BNP Paribas Prime Brokerage, Inc. The terms of the agreement provide for an \$85,000,000 facility that is secured by certain of the Company's assets. Outstanding balances generally will accrue interest at a variable rate equal to one-month LIBOR plus 0.80 percent.

The average principal balance and interest rate for the period during which the margin loan facility was utilized for the period from September 25, 2014 (the date the facility was established) through November 30, 2014 was approximately \$59,000,000 and 0.95 percent, respectively. At November 30, 2014, the principal balance outstanding was \$56,200,000 at an interest rate of 0.95 percent.

For the period from December 1, 2013 through September 25, 2014, the Company had a 270-day rolling evergreen margin loan facility with Bank of America, N.A. The terms of the agreement provided for a \$65,000,000 facility that was secured by certain of the Company's assets. Outstanding balances generally accrued interest at a variable rate equal to one-month LIBOR plus 0.85 percent and unused portions of the facility accrued a fee equal to an annual rate of 0.25 percent. The average principal balance and interest rate for the period during which this margin loan facility was utilized during the period from December 1, 2013 through September 25, 2014 (the date the facility was terminated) was approximately \$56,100,000 and 1.01 percent, respectively.

Under the terms of the margin loan facility, the Company must maintain asset coverage required under the 1940 Act. If the Company fails to maintain the required coverage, it may be required to repay a portion of an outstanding balance until the coverage requirement has been met. At November 30, 2014, the Company was in compliance with the terms of the margin loan facility.

11. Subsequent events

The Company has performed an evaluation of subsequent events through the date the financial statements were issued and has determined that no items require recognition or disclosure.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders Tortoise Energy Independence Fund, Inc.

We have audited the accompanying statement of assets and liabilities of Tortoise Energy Independence Fund, Inc. (the Company), including the schedule of investments, as of November 30, 2014, and the related statements of operations and cash flows for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the periods indicated therein. These financial statements and financial highlights are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also

includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of November 30, 2014, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Tortoise Energy Independence Fund, Inc. at November 30, 2014, the results of its operations and its cash flows for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the periods indicated therein, in conformity with U.S. generally accepted accounting principles.

Additional Information (unaudited)

Notice to stockholders

For stockholders that do not have a November 30, 2014 tax year end, this notice is for information purposes only. For stockholders with a November 30, 2014 tax year end, please consult your tax advisor as to the pertinence of this notice. For the fiscal year ended November 30, 2014, the Company is designating the following items with regard to distributions paid during the year.

Common distributions

Return Of Capital Distributions	Long-Term Capital Gain Distributions ⁽¹⁾	Ordinary Income Distributions	Total Distributions	Qualifying Dividends ⁽²⁾	Qualifying For Corporate Dividends Rec. Deduction ⁽³⁾
5.05%	27.10%	67.85%	100.00%	17.56%	3.95%

- (1) The Company designates long-term capital gain distributions per IRC Code Sec. 852(b)(3)(C). The long-term capital gain tax rate is variable based on the taxpayer's taxable income.
- (2) Represents the portion of Ordinary Income Distributions taxable at the capital gain tax rates if the stockholder meets holding period requirements.
- (3) Represents the portion of Ordinary Income Distributions which qualify for the "Corporate Dividends Received Deduction."

Director and officer compensation

The Company does not compensate any of its directors who are "interested persons," as defined in Section 2(a)(19) of the 1940 Act, nor any of its officers. For the year ended November 30, 2014, the aggregate compensation paid by the Company to the independent directors was \$81,000. The Company did not pay any special compensation to any of its directors or officers.

Forward-looking statements

This report contains "forward-looking statements" within the meaning of the Securities Act of 1933 and the Securities Exchange Act of 1934. By their nature, all forward-looking statements involve risks and uncertainties, and actual results could differ materially from those contemplated by the forward-looking statements. Several factors that could materially affect the Company's actual results are the performance of the portfolio of investments held by it, the conditions in the U.S. and international financial, petroleum and other markets, the price at which shares of the Company will trade in the public markets and other factors discussed in filings with the SEC.

Proxy voting policies

A description of the policies and procedures that the Company uses to determine how to vote proxies relating to portfolio securities owned by the Company and information regarding how the Company voted proxies relating to the portfolio of securities during the 12-month period ended June 30, 2014 are available to stockholders (i) without charge, upon request by calling the Company at (913) 981-1020 or toll-free at (866) 362-9331 and on the Company's Web site at www.tortoiseadvisors.com; and (ii) on the SEC's Web site at www.sec.gov.

Form N-Q

The Company files its complete schedule of portfolio holdings for the first and third quarters of each fiscal year with the SEC on Form N-Q. The Company's Form N-Q is available without charge upon request by calling the Company at (866) 362-9331 or by visiting the SEC's Web site at www.sec.gov. In addition, you may review and copy the Company's Form N-Q at the SEC's Public Reference Room in Washington D.C. You may obtain information on the operation of the Public Reference Room by calling (800) SEC-0330.

The Company's Form N-Qs are also available via the Company's Web site at www.tortoiseadvisors.com.

Statement of additional information

The Statement of Additional Information ("SAI") includes additional information about the Company's directors and is available upon request without charge by calling the Company at (866) 362-9331 or by visiting the SEC's Web site at www.sec.gov.

Certifications

The Company's Chief Executive Officer has submitted to the New York Stock Exchange the annual certification as required by Section 303A.12(a) of the NYSE Listed Company Manual.

The Company has filed with the SEC, as an exhibit to its most recently filed Form N-CSR, the certification of its Chief Executive Officer and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act.

Additional Information (unaudited) (continued)

Privacy policy

In order to conduct its business, the Company collects and maintains certain nonpublic personal information about its stockholders of record with respect to their transactions in shares of the Company's securities. This information includes the stockholder's address, tax identification or Social Security number, share balances, and distribution elections. We do not collect or maintain personal information about stockholders whose share balances of our securities are held in "street name" by a financial institution such as a bank or broker.

We do not disclose any nonpublic personal information about you, the Company's other stockholders or the Company's former stockholders to third parties unless necessary to process a transaction, service an account, or as otherwise permitted by law.

To protect your personal information internally, we restrict access to nonpublic personal information about the Company's stockholders to those employees who need to know that information to provide services to our stockholders. We also maintain certain other safeguards to protect your nonpublic personal information.

Repurchase disclosure

Notice is hereby given in accordance with Section 23(c) of the 1940 Act, that the Company may from time to time purchase shares of its common stock in the open market.

Automatic dividend reinvestment plan

If a stockholder's shares are registered directly with the Company or with a brokerage firm that participates in the Company's Automatic Dividend Reinvestment Plan (the "Plan"), all distributions are automatically reinvested for stockholders by the Plan Agent in additional shares of common stock of the Company (unless a stockholder is ineligible or elects otherwise). Stockholders holding shares that participate in the Plan in a brokerage account may not be able to transfer the shares to another broker and continue to participate in the Plan. Stockholders who elect not to participate in the Plan will receive all distributions payable in cash paid by check mailed directly to the stockholder of record (or, if the shares are held in street or other nominee name, then to such nominee) by Computershare, as dividend paying agent. Distributions subject to tax (if any) are taxable whether or not shares are reinvested.

If, on the distribution payment date, the net asset value per share of the common stock is equal to or less than the market price per share of common stock plus estimated brokerage commissions, the Company will issue additional shares of common stock to participants. The number of shares will be determined by the greater of the net asset value per share or 95 percent of the market price. Otherwise, shares generally will be purchased on the open market by the Plan Agent as soon as possible following the payment date or purchase date, but in no event later than 30 days after such date except as necessary to comply with applicable law. There are no brokerage charges with respect to shares issued directly by the Company as a result of distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open-market purchases in connection with the reinvestment of distributions. If a participant elects to have the Plan Agent sell part or all of his or her common stock and remit the proceeds, such participant will be charged a transaction fee of \$15.00 plus his or her pro rata share of brokerage commissions on the shares sold.

Participation is completely voluntary. Stockholders may elect not to participate in the Plan, and participation may be terminated or resumed at any time without penalty, by giving notice in writing, by telephone or Internet to Computershare, the Plan Agent, at the address set forth below. Such termination will be effective with respect to a particular distribution if notice is received prior to such record date.

Additional information about the Plan may be obtained by writing to Computershare Trust Company, N.A., P.O. Box 30170, College Station, TX 77842-3170. You may also contact Computershare by phone at (800) 426-5523 or visit their Web site at www.computershare.com.

Approval of the Investment Advisory Agreement

In approving the renewal of the Investment Advisory Agreement in November 2014, the directors who are not "interested persons" (as defined in the Investment Company Act of 1940) of the Company ("Independent Directors") requested and received extensive data and information from the Adviser concerning the Company and the services provided to it by the Adviser under the Investment Advisory Agreement, including information from independent, third-party sources, regarding the factors considered in their evaluation. Before the

Additional Information (unaudited) (continued)

Independent Directors voted on approval of the Investment Advisory Agreement, the Independent Directors met with independent legal counsel during executive session and discussed the agreement and related information.

Factors Considered

The Independent Directors considered and evaluated all the information provided by the Adviser. The Independent Directors did not identify any single factor as being all-important or controlling, and each Independent Director may have attributed different levels of importance to different factors. In deciding to renew the agreement, the Independent Directors' decision was based on the following factors.

Nature, Extent and Quality of Services Provided.

The Independent Directors considered information regarding the history, qualification and background of the Adviser and the individuals primarily responsible for the portfolio management of the Company. Additionally, the Independent Directors considered the extent of the resources devoted to research and analysis of the Company's actual and potential investments, including the research and decision-making processes utilized by the Adviser, as well as risk oversight and the methods adopted to seek to achieve compliance with the investment objectives, policies and restrictions of the Company, and meeting regulatory requirements. Further, the Independent Directors considered the adequacy of the number of the Adviser personnel (including the caliber of portfolio managers and research analysts involved, the large and experienced team of investment, accounting, trading, client service and compliance professionals dedicated to the Company), the continued addition of professionals at the Adviser to broaden its coverage efforts, and other Adviser resources and plans for growth, use of affiliates of the Adviser, and the particular expertise with respect to energy companies, MLP markets and financing (including private financing).

In addition to advisory services, the Independent Directors considered the quality of the administrative and other non-investment advisory services provided to the Company. The Adviser provides the Company with certain services (in addition to any such services provided to the Company by third parties) and officers and other personnel as are necessary for the operations of the Company. In particular, the Adviser provides the Company with the following administrative services including, among others: (i) preparing disclosure documents, such as periodic stockholder

reports and the prospectus and the statement of additional information in connection with public offerings; (ii) communicating with analysts to support secondary market analysis of the Company; (iii) oversight of daily accounting and pricing; (iv) preparing periodic filings with regulators and stock exchanges; (v) overseeing and coordinating the activities of other service providers; (vi) organizing Board meetings and preparing the materials for such Board meetings; (viii) providing compliance support; (viii) furnishing analytical and other support to assist the Board in its consideration of strategic issues; (ix) the responsible handling of the leverage target; and (x) performing other administrative services for the operation of the Company, such as press releases, fact sheets, investor calls, leverage financing, tax reporting, tax management, fulfilling regulatory filing requirements and investor relations services.

The Independent Directors also reviewed information received from the Adviser and the Company's Chief Compliance Officer (the "CCO") regarding the compliance policies and procedures established pursuant to the 1940 Act and their applicability to the Company, including the Company's Code of Ethics.

The Independent Directors concluded that the nature of the Company and the specialized expertise of the Adviser in the energy market, as well as the nature, extent and quality of services provided by the Adviser to the Company, made it qualified to serve as the adviser. The Independent Directors recognized that the Adviser's commitment to a long-term investment horizon correlated well to the investment strategy of the Company.

Investment Performance of the Company and the Adviser, Costs of the Services To Be Provided and Profits To Be Realized by the Adviser and its Affiliates from the Relationship, and Fee Comparisons. The Independent Directors reviewed and evaluated information regarding the Company's performance and the performance of the other Adviser accounts (including other investment companies), and information regarding the nature of the markets during the performance period, with a particular focus on the energy sector. The Independent Directors considered the Company's investment performance for oneyear and since inception periods against peer funds as well as specialized sector and more general market indices, and senior management's and portfolio managers' analysis of the reasons for any over-performance or underperformance against its peers and/or sector market indices, as applicable. The Independent Directors noted that for the relevant

Additional Information (unaudited) (continued)

periods, based on NAV, the Company's performance outperformed the average for its peers and the sector market index, and based on market price, the Company has both outperformed and underperformed the average for its peers depending on the period. The Independent Directors noted the lack of peers with similar strategies to the Company. The Independent Directors also noted that the sector market index is pre expenses, in contrast to the Company and its peers. The Independent Directors also noted differences across the peer universe in distribution and leverage strategies, including the Company's focus on sustainable distributions and a more conservative leverage strategy, and took into account that stockholders, in pursuing their investment goals and objectives, likely purchased their shares based upon the reputation and the investment style, long-term philosophy and strategy of the Adviser. The Independent Directors also considered discussions with the Adviser regarding a variety of strategic alternatives for the Company, including the Adviser's plans to continue aftermarket support and investor communications regarding recent market price performance. Based upon their review, the Independent Directors concluded that the Company's performance has been reasonable based on the Company's strategy and compared to other closed-end funds that focus on the energy sector and that the Company has generated reasonable returns for investors.

The Adviser provided detailed information concerning its cost of providing services to the Company, its profitability in managing the Company, its overall profitability, and its financial condition. The Independent Directors reviewed the methodology used to prepare this financial information. This financial information regarding the Adviser is considered in order to evaluate the Adviser's financial condition, its ability to continue to provide services under the Investment Advisory Agreement, and the reasonableness of the current management fee, and was, to the extent possible, evaluated in comparison to other more specialized investment advisers to closed-end funds.

The Independent Directors considered and evaluated information regarding fees charged to, and services provided to, other investment companies advised by the Adviser (including the impact of any fee waiver or reimbursement arrangements and any expense reimbursement arrangements), and fees charged to separate institutional accounts and other accounts managed by the Adviser. The information provided to the Independent Directors discussed

the significant differences in scope of services provided to the Company and to the Adviser's other clients. The Independent Directors considered the fee comparisons in light of the different services provided in managing these other types of clients. The Independent Directors considered and evaluated the information they received comparing the Company's contractual annual advisory fee and overall expenses with a peer group of comparable closed-end funds with similar investment objectives and strategies, including other energy investment companies determined by the Adviser. Given the specialized universe of managers and funds fitting within the criteria for the peer group as well as a lack of reliable, consistent third party data, the Adviser did not believe that it would be beneficial to engage the services of an independent third-party to prepare the peer group analysis, and the Independent Directors concurred with this approach. The Adviser provided information on the methodology used for determining the peer group.

The Independent Directors concluded that the fees (including the management fee) and expenses that the Company is paying under the Investment Advisory Agreement, as well as the operating expense ratios of the Company, are reasonable given the quality of services provided under the Investment Advisory Agreement and that such fees and expenses are reasonable compared to the fees charged by advisers to comparable funds. The Independent Directors also considered the Adviser's contractual agreement to waive fees in the amount of 0.10 percent of its 1.10 percent investment advisory fee for the period from January 1, 2015 through December 31, 2016, thereby reducing the fee to 1.00 percent.

Economies of Scale. The Independent Directors considered information from the Adviser concerning whether economies of scale would be realized as the Company grows, and whether fee levels reflect any economies of scale for the benefit of the Company's stockholders. The Independent Directors concluded that economies of scale are difficult to measure and predict overall. Accordingly, the Independent Directors reviewed other information, such as year-over-year profitability of the Adviser generally, the profitability of its management of the Company, and the fees of competitive funds not managed by the Adviser over a range of asset sizes. The Independent Directors concluded the Adviser is appropriately sharing any economies of scale through its fee structure and through reinvestment in its business resources to provide stockholders additional content and services.

Additional Information (unaudited) (continued)

Collateral Benefits Derived by the Adviser. The Independent Directors reviewed information from the Adviser concerning collateral benefits it receives as a result of its relationship with the Company. They concluded that the Adviser generally does not directly use the Company's or stockholder information to generate profits in other lines of business, and therefore does not derive any significant collateral benefits from them.

The Independent Directors did not, with respect to their deliberations concerning their approval of the continuation of the Investment Advisory Agreement, consider the benefits the Adviser may derive from relationships the Adviser may have with brokers through soft dollar arrangements because the Adviser does not employ any such arrangements in rendering its advisory services to the Company. Although the Adviser may receive research from brokers with whom it places trades on behalf of clients, the Adviser does not have soft dollar arrangements or understandings with such brokers regarding receipt of research in return for commissions.

Conclusions of the Directors

The Independent Directors concluded that no single factor reviewed was determinative as the principal factor in whether to approve the Agreement. The process, as discussed above, describes only the most important factors, but not all of the matters, considered by the Independent Directors. On the basis of such information as the Independent Directors considered necessary to the exercise of its reasonable business judgment and its evaluation of all of the factors described above, and after discussion and as assisted by the advice of legal counsel that is independent of the Adviser, the Independent Directors determined that each factor, in the context of all of the other factors they considered, favored approval of the Agreement. The Independent Directors therefore unanimously concluded that the Investment Advisory Agreement between the Company and the Adviser is fair and reasonable in light of the services provided and should be renewed. It was noted that it was the judgment of the Independent Directors that approval of the Investment Advisory Agreement was in the best interests of the Company and its shareholders.
